Conceptual Review

a. Suppose independent $X, Y \sim N(0, 1)$. Identify the distribution of:

- (a) X^2 ;
- (b) $X^2 + Y^2$;
- (c) $\sqrt{X^2 + Y^2}$;
- (d) $4X + 3Y + 5$

Problem 1

Suppose X_1, X_2 are independent random variables with the same density function.

- a. Evaluate $P(X_1 < X_2)$;
- b. Continuing, suppose X_1, X_2, X_3 are independent random variables with the same density function. Evaluate $P(X_{i_1} < X_{i_2} < X_{i_3})$ where (i_1, i_2, i_3) is a given permutation of $(1, 2, 3)$.

Ex 5.2.18 in Pitman's Probability

Problem 2

X, Y are i.i.d. standard Normal variables. Find (without integration):

- a. $P(X > 3Y + 2)$;
- b. $P(0 < X < Y)$;
- c. $P(|\min X, Y| < 1)$
